Dwarf Grafted Citrus Pipsqueak®

What Makes Citrus Pipsqueak® Dwarf?

Pipsqueak® is grafted onto Flying Dragon Rootstock, making it by Australian and International standards a true dwarf citrus. Flying Dragon rootstock inhibits the overall size of the citrus tree, it does not restrict fruit size or crop yield.

Pipsqueak®, strengthened with the dwarfing powers of Flying Dragon, is very robust, resistant to diseases and able to produce crops of delicious, full sized citrus fruits.

Compact and easily pleased Pipsqueak® is ideal for the garden or pots. Pipsqueak® will grow to a shrub of 1.5 – 2 metres. Pruning will keep Pipsqueak® even more compact.

The Juicing Orange – Valencia Orange

Coming into season in spring the Valencia is a luscious juicy fruit. Run out to your tree with your basket and load up. You'll never buy another bottle of orange juice again.

GROWING GUIDE

Monitor your watering with the weather: less in the cooler wet and increase in the heat and dry.

Fertiliser is a regular requirement and necessary to maintain a healthy tree and bountiful crops of fruit.

Prune to maintain a shapely and evenly balanced tree.

Pipsqueak® loves sun: preferring a warm, sheltered position.

Grown and Propagated by:
Eyles Citrus, Kenthurst NSW 2156

Sweet Juicy Lemon – Meyer Lemon

A cross between an orange and a lemon makes Meyer a very mild tasting lemon, which is almost orange in colour.

The Meyer produces fruit throughout the year and is a very heavy cropping tree.
